Blood Pressure Monitor

WRIST WATCH

WHAT IS BLOOD PRESSURE ?

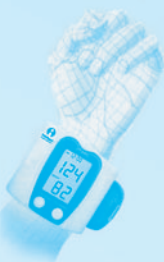

A force is created by the heart as it pushes blood into the arteries and through the blood circulation system. Another force is created by the arteries as they resist the blood flow. Blood Pressure is the result of these two forces.

High blood pressure is the third greatest cause of disease in Australia. High Blood pressure is a major risk factor for coronary heart disease, stroke, heart failure, peripheral vascular disease and renal failure.

In Australia, there is nearly one untreated and possibly undiagnosed person with hypertension, for every person on treatment. By monitoring your blood pressure on a regular basis you can be aware of any changes. Knowing what your blood pressure is and having a consistent accurate reading that you can trust is important. Don't become a statistic, check your blood pressure regularly.

SIMPLE AND EASY!

The **Automatic Blood Pressure Monitor** will enable you to monitor your blood pressure in the comfort of your own home. With its extra large buttons and display, and along with the automatic inflation and deflation of the cuff - monitoring your blood pressure cannot be made any easier.

- Fuzzy logic
- User friendly one-button control panel
- Simple to use
- Extra large buttons
- Automatic measuring procedure
- Easily fitted cuff
- Automatic pressure pre-selection for short measuring times
- Extra large display with integrated time and date
