

Opticare eye drop dispensers

Take control
of eye drops

NEW

**Do you know someone who struggles with their eye drops?
Opticare can help.**

Confidence booster

Opticare is grip sized and cylindrical to boost confidence and support independence. Use with most round and oval plastic bottles (2.5 – 15ml).

Comfortable

The eye piece is designed for comfort and ensures that the bottle tip cannot touch the eye. Instil drops whilst standing, sitting or lying down.

Easy to use

Making it easier to squeeze the bottle, Opticare directs drops into the eye and not down the cheek.

Durable and portable

Designed for repeat use, the dispenser fits easily into a handbag or a pocket. Wash in the dishwasher or warm soapy water.

Opticare eye drop dispensers

Take control of eye drops

A helping hand

Opticare makes it easier to squeeze eye drop bottles and ensure that drops are aimed at a suitable distance from the eye. The eye piece is designed to help combat the natural blink reflex.

Non standard bottles

Eye drop bottles come in many different shapes and sizes. So, Opticare is supplied with a simple collar that fits easily around the neck of some non standard bottles to allow a snug fit inside the dispenser.

A range of colours

Many eye drop users struggle with more than one bottle so Opticare comes in a variety of colours for use with multiple eye drop bottles.
